**Digital Transformation
in an Evolving World**

World Congress of the International Society for Prosthetics and Orthotics

INTERNATIONAL
SOCIETY FOR PROSTHETICS
AND ORTHOTICS

www.ispo-congress.com

ISPO World Congress

Every two years, the International Society for Prosthetics and Orthotics invites professionals involved in the care of persons in need of prosthetic, orthotic, mobility, and assistive devices to its unique and interactive flagship meeting, the ISPO World Congress.

This year, ISPO will host a virtual event – participate from the comfort of your own home or workplace!

exhibition area

The programme published in June at www.ispo-congress.com!

50th Anniversary celebrations

The World Congress will also be the highlight to end the celebrations of the **50th anniversary of the International Society for Prosthetics and Orthotics.**

Digital Transformation in an Evolving World

The world is evolving, with digital methods at the root of many of these changes. This digital transformation affects all aspects of using and working with assistive technology, from booking a clinic appointment and electronic health records, to computer aided design, to microprocessor-controlled prostheses or orthoses, to video conferencing and social media. The ISPO World Congress will explore this “**Digital Transformation in an Evolving World**” theme and help our field move forward, making the best use of digital and artificial intelligence technology to provide the best services anywhere in the world.

Expect a **high-calibre scientific programme** delivered by professionals from various world regions and broad-ranging fields of expertise during **keynote lectures, symposia, instructional courses, and free paper and poster presentations.**

Keynote speakers

Dr Alarcos Cieza

Unit Head, Sensory Functions, Disability and Rehabilitation, World Health Organisation (WHO), Geneva, Switzerland

Dr Matthew Major

Assistant Professor, Dep. of Physical Medicine & Rehabilitation / Dep. of Biomedical Engineering, Northwestern University, and Research Health Scientist, Jesse Brown VA Medical Center, Chicago, USA
